*pricing is a baseline - complexity of object will determine cost

Museums

3D photo-realistic digitization for preservation, educational research, museum outreach, archiving, and virtual visualization purposes

Government and National Parks

Immersive photo-realistic VR production for infrastructure and site management, educational outreach, park promotion, change detection, and ecological valuation

Archeological

Photogrammetry surveys and 3D reconstructions for active archeological digs, education, site management, insurance, and change detection

Commercial

Educate staff and end-users on your products, services, company culture, and more. Tell us your training and onboarding needs and we will tailor a solution.

Tourism

Leverage cutting edge technologies and creative solutions for a robust ROI. With targeted VR/AR "programming" we can customize content to get you the tourist that best serves your needs

Immersive Site Scouting

For preproduction needs for movies and entertainment, to event planning, journalism, construction, architecture and much more

Installation Content Creation

For "immersive experiences" using LED video and projection displays. For concerts, sports, events, and shows that will create a shared experience with your virtual assets

DESSERTS

Storyboarding / Creative Consulting

Let us deep dive into what you and your organization make you who you are, and construct a narrative that is memorable and coherent

Object Animations

We can make your digital assets talk, walk, and come to life for education, entertainment, social media outreach, and much more

Bespoke App Development

Integration with your existing application or the wholesale creation of apps for a variety of different devices
